Personal Summary

First Class MSc Robotics and BSc Physics graduate working in AI safety operations, the dependable generalist who just handles it. I've built and run research-adjacent programs end to end: fellowship admissions and cohort placement at EA Manchester, vendor workstreams and live production for the Summit on Existential Security, and room management at EAG London. My technical background means I can follow alignment research, and I instinctively systematise and automate recurring work, increasingly with AI, so lean teams scale without dropping balls. I'm motivated by reducing AI risk and energised by helping a team do its best work.

Professional Experience

The Centre for Effective Altruism · part-time

2026 – present

EAG Content & Events Assistant · EA Global NYC 2026

- Own day-to-day content execution: speaker comms and onboarding, the content and speaker tracker, org fair and meetup logistics, and run-of-show coordination with production, AV and videography.

Production Coordinator · Summit on Existential Security (UK)

- Sourced and negotiated with suppliers, then project managed their workstreams from initiation to delivery, on time and under budget.
- Challenged our shuttle bookings with data, halving them and saving £5,000.
- Ran the production room, resolving live issues and keeping concurrent workstreams on schedule.

Room Manager · EA Global London 2026

- Ran the 300-capacity workshop room, turning over back-to-back sessions on a tight schedule.
- Built per-speaker setup checklists and acted as the in-room point person for live issues.

Effective Altruism Manchester · part-time

Chair

2024 – 2025

- Ran the Intro and In-Depth fellowships end to end: processed hundreds of applications, placed fellows across up to six cohorts per semester, and recruited and supported facilitators.
- Managed a £10,000+ budget and built the group's website.
- Shifted the group from week-to-week running to semester-ahead planning, with onboarding simple enough for new volunteers to start fast.
- Grew and managed the committee from 2 to 10 and more than doubled the society's reach; mentored members, several now in high-impact roles.

Events Officer

2023 – 2024

- Doubled talks hosted and grew event sign-ups from the low tens to over 100.

The Corrie Hotel · Isle of Arran, Scotland · part-time

Shift Supervisor

2023

- Introduced a point-of-sale system with automated stock tracking, saving hundreds of staff hours.
- Redesigned the breakfast set-up, halving prep time, and designed whisky and gin menus that doubled sales.

Front of House

2022

- Delivered front-of-house service across the bar, restaurant, and breakfast service in a busy island hotel.

Insight Placements

2021

One week at each of PricewaterhouseCoopers, The Royal National Theatre, and Nando's Ltd.

Education

The University of Manchester

2021 – 2025

- **MSc Robotics, First Class Honours, ranked highest in cohort.** Modules included Machine Learning, Software for Robotics, and Robotic Vision.
- Dissertation: "Corroborative Verification and Validation of an Autonomous Warehouse Inspection Robot Using High-Fidelity Simulation and Probabilistic Model Checking."
- **BSc Physics, First Class Honours.** Modules included Object-Oriented Programming in C++, Computational Physics, Particle Physics, and Applications of Quantum Physics.

Abingdon School

2016 – 2021

- A-levels: Mathematics A*, Physics A*, Geography A*, Further Mathematics A, EPQ A*.
- GCSE: 11 subjects at A* equivalent, including Additional Mathematics, Physics, and Computer Science.
- Charities Committee Chair: led fundraising events including a sponsored walk raising £40,000; rebuilt the charity tuck shop's stock-tracking system, turning a loss-making enterprise into £3,000/year for charity.
- Devised and taught Royal Institution mathematics masterclasses for disadvantaged pupils.

Skills & Interests

- Operations: Google Workspace, Slack, Notion, Airtable, Monday, Luma, Calendly, Canva, Squarespace. AI tools including Claude, ChatGPT and Gemini to automate recurring work.
- Programming: Python (including PyTorch), C++, ROS2, Git, Linux.
- Technical AI Safety course (BlueDot Impact) and Neural Networks: Zero to Hero (Andrej Karpathy); I've built language models from scratch and a deep-learning object classifier for robotics, and keep close to current AI safety research, news and debate.
- GWWC pledger since 2022, PADI Advanced Open Water Diver and keen traveller.
